

Industrial Food Dryer Machine----Brazilian Customers Visit

We are a company specializing in the design and production of large-scale food processing equipment. We have been engaged in the food industry for many years and have rich production experience. The primary machines include puffed snack machines, automatic biscuit making machines, fried french fries machines, food dryers, etc. Type of equipment. Recently, we received several customers from Brazil. They came to visit the factory and planned to buy our [Industrial Food Dryer Machine](#). We introduced them to the factory equipment and finally reached an agreement.

Industrial food dryer machine

As shown in the figure, this is our Industrial Food Dryer Machine. It is a new type of drying equipment with high production efficiency and low operating cost. It is also an efficient, environmentally friendly, and energy-saving equipment, especially for food drying: sterilization and fresh-keeping functions. The machine has been widely involved in pharmaceutical, food, chemical, building materials, and other industries.

Advantages of Industrial Food Dryer Machine:

1. High efficiency: Since Industrial food drying equipment is easily absorbed by moisture-containing materials, there is almost no waste, which significantly improves production efficiency.
2. Energy-saving: Compared with the traditional UV heating method, Industrial dryers will save at least 30% of energy.
3. Keep fresh: The sterilization temperature of the Food dryer is low, so it can well protect the nutrients in food.
4. Easy to control: The food drying production line can be easily controlled, which can be used to continuously dry food to save labor.
5. The contained material quickly absorbs heat, so there is no other heat loss except for a small transmission loss. Food drying equipment has higher thermal efficiency and a more energy-saving effect. Compared with far infrared heating, heating energy saving is 1/3.

The following picture is some food samples produced by our food dryer. The machine is widely used and can dry a variety of materials to meet the different needs of food processing plants. Our products have been sold all over the world and are in the same industry. The position of being far ahead is favored by customers. At the same time, we are continually improving our equipment, keeping pace with the times, and providing customers with better equipment.

Sample dry food

After the Brazilian customer came to the company, we had a conversation, and then we went to the factory together. Seeing our Industrial Food Dryer Machine, they asked some questions, and we also arranged for professionals to answer them. After eliminating some doubts, they did another experiment, and the experiment effect was excellent, and they expressed great

satisfaction.

Brazilian customer is visiting

During this visit, customers in Brazil purchased three of our Industrial Food Dryer Machines. To make everyone feel at ease in shopping, we recommend using a prepaid deposit payment method to let customers feel the intimate service of cash on delivery. The remaining goods will be inspected after delivery, and there will be no problems with logistics collection.

We express that we will deliver the goods as soon as possible within 24 hours, and the freight will be paid in full. Regarding the installation and commissioning of the machine, if there is something that is not possible or does not understand, please contact us in time, we will answer one by one. If necessary, they said that they would also consider buying our other equipment. This time the cooperation with Brazilian customers is enjoyable, and we look forward to our next collaboration!
