

300000 Bags/8 Hours Instant Noodle Machine Will Be Shipped To South Africa

300000 Bags/8 Hours Instant Noodle Machine Will Be Shipped To South Africa by Shandong Loyal Industrial Co.,Ltd., we provide latest information about the products regularly.

As a professional commercial instant noodle manufacturer, we have a dedicated instant noodle machine promotion channel, this South African customer contacted me through Alibaba. This South African customer already has a production line of 11,000 packs of ramen instant noodles, which has strong taste, delicious taste, and good sales. Ramen instant noodles are made by steaming and frying the shredded noodles, so that the shape of the noodles is fixed, generally square or round. Before eating, they are brewed with boiling water to dissolve the seasonings, and the noodles are heated and brewed. And ramen instant noodle food that can be eaten in a short time.

After that, on the Alibaba platform, i added South African customer's WhatsApp, so that we can further communicate about the instant noodle production line. First, i sent our instant noodle samples pictures to the South African customer to confirm whether the customer wanted to produce round instant noodle or square instant noodle.

(Instant Noodle Samples Pictures)

The South African customer said that he wanted to know the price difference between round instant noodle or square instant noodle? I immediately sent the technical parameters and price range of the 30,000 bags instant noodle production line to the customer. And i explained the difference between round instant noodle or square instant noodle machines in detail to customers.

Nowadays, various brands of instant noodles on the market fill the shelves of major shopping malls. From large retail supermarkets to small street shops, you can almost see ramen instant food. Afterwards, I also discussed the raw materials and formula of instant noodles with the South Africa instant noodle customer. Because the customer already has an instant noodle factory and has its own unique production process, there is no need for us to provide formula guidance. Secondly, we discussed the payment methods, shipping costs, installation and debugging and other issues. The South Africa customer and his team finally decided to buy our fully automatic 30,000 bags instant noodle production line, and the instant noodle machine will be shipped to South Africa after 40 working days.
